

Casino Win for Cumberland

Newcastle casino project

In today's ever more competitive environment, where budgets need to work harder, Cumberland Construction's unique blend of skills guarantee an unprecedented service. Established for 30 years, Cumberland recently embarked on the refurbishment of the largest regional casino in the UK and an exclusive primate members club in the heart of Mayfair.

This is our 30th Anniversary and it's simple really, we never settle for second best.

Our belief is that each client, no matter how big or small, is our most important. Each receives a bespoke service reflecting that.

World-renowned casino operator, Aspers uphold this view. Cumberland delivered on budget and on time for Aspinalls private members casino in Mayfair (see inset pictures) and a new Las Vegas-style casino - the first of many to be rolled out. Cumberland developed the exciting concept of BatesSmart, the Australian designers and architects.

Cumberland's successful refit of Curzon Street

The scale and complexities of the Newcastle competitive tender meant we basically inherited a 45,000 sq foot shell. Our team completely developed the design and built it to the highest standards.

This included the construction of new mezzanine floors and back of house area. We also paid great attention to detail in getting the front of house setting right including the creation of bars, kitchen and restaurant areas.

The project has received extensive acclaim from within the industry and Cumberland hit the jackpot winning the RLI Global Shopfitters Award.

These are very exciting times for us, we are expanding operations, winning more contracts, employing more staff and completing some fantastic projects. The Aspers Casino project was a real milestone for us, our understanding is that it is the largest regional casino in the UK. Following this success it probably makes us the leading contractor for casinos in the UK at the moment.

Overview of Cumberland's refit

This project, combined with Cumberland's experience in refurbishing and refitting the second floor of Aspinalls private members townhouse casino in Curzon Street London, highlights that working with Cumberland is no gamble.

With the recent awarding of Casino licences throughout the UK, Cumberland are in a prime position to take their skills, knowledge and experience forward.
